Modern Round Planters

AVAILABLE IN VARIOUS SIZES

10"

10" D x 10" H
3 Gal Soil Capacity

12"

12" D x 12" H
5 Gal Soil Capacity

14"

14" D x 14" H
8 Gal Soil Capacity

IN THE BOX
(for each planter)

Drainage plugs

2 pcs

Optional Drainage

Each planter has two pre-drilled drainage holes in the base.

Outdoors, leave them open so extra water runs out and roots stay healthy.

Indoors, press a plug into each hole to keep water in and floors dry.

SET UP

01

Unbox & Inspect

Remove the planters and the drain plugs from the packaging. Check each planter for damage before planting.

02

Choose a Spot

Decide where the planter will live before you fill it. Once it's full of soil and water, it's much harder to move.

03

Indoors: Fit the Plugs

Before planting, turn the planter over and press a plug firmly into each hole from the outside until it's snug.

04

Outdoors: Leave Holes Open

Set the planter on a level surface and keep the holes clear. Hang on to the plugs in case you move it indoors later.

05

Fill with Potting Mix

Add potting mix to about 2 in below the rim. The 14 in holds about 8 gal, the 12 in about 5 gal and the 10 in about 3 gal.

06

Plant & Water

Set your plants at the same depth they grew in their nursery pots, firm the soil around them, then water thoroughly.

A little care.

Wipe clean with a soft cloth and mild soap. Use light-pressure water for best results.

Built to last.

Polypropylene construction resists weather, rot, and fading season after season.

We're here.
